INTRODUCTION

Many times in history groups, organizations and countries have tried to seize control of the world in one way or another to make themselves a god to others. By overthrowing the ruler, king or president, they seize the country.

Today, many people who criticize others and exalt themselves to gain power and fame. They will rule by force and may even kill or have others killed to gain that power if necessary. There are such organizations that will do this secretly and some of these are the Central Intelligence Agency (CIA), Counsel of Foreign Relations (CFR), Trilateral Commission (TC), and the INCOME TAX people, others not named in the document.

Many of our presidents and others in Washington either belong to the CFR and/or TC, except one president and that is Ronald Reagan. Many of the people in high places also belong to one or both of the organizations mentioned above and the Masonic Lodge, and many others. Such high places as: The news media, the television heads, radio, newspaper, also in the local government, the oil companies, the automobile companies, the utility's companies, etc.

Many people today have become very selfish, got what they want, or take from others. This will include the marriages as well. People do not want to give 60% and take 40% as it should be. If they did so the marriages and others would get along much better.

Different groups have tried to take control of the world at various times throughout history; for instance: The Grecians; the Babylonians; the Egyptians; the Romans; the Catholicism; the Nazism; the Communism; the modern day Illuminati (CFR, in the U. S.). These rulers have had great success in seizing control of the world but did not complete their mission due to failure in some way.

Many times there are things that happen that go unnoticed or passes after a while, especially when it's claimed that they got their man. What about this example – retired Naval Lt. William Pitzer, who had photographed the secret John F. Kennedy autopsy and was beginning a job with a TV station was found dead with a bullet in his head. Also it's claimed that John F. Kennedy was shot from two angles indicating two persons were involved.

The conspirators have reinterpreted the constitution. They have tried to have laws passed by trying it in one state first, usually New York. One example is the gun law. The only gun that goes off is the one that is operated by a nut, or dope-head or someone being careless of having a person get hold of it. If people knew how to handle a gun and teach their children the pros and cons about them, this definitely would be a better world to live in.

You may say this is something that has come up and made up. No, the information in this document has been known and documented as far back as the 1920's and 1930's, by Nesta Webster, who wrote a number of books on the Illuminati and other conspiracies. Some of the information in this document is my opinion based on the documentation of the Bible and written books of the past. Events and dates are factorial. Other references are in the back of this document.
